**DETAILED ACTION*****Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/25/2005 has been entered.
2. Applicants' amendment dated 06/27/2005 has been received and entered. By the amendment, Claims 170-188 and newly added claims 189-192 are now pending in the application.

***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 170-192 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3, 8 and 9 of U.S. Patent No.

Art Unit: 2871

6,724,452. Although the conflicting claims are not identical, they are not patentably distinct from each other because both application and patent disclose the same an electrically controlled birefringence type liquid crystal display device having a first substrate including first domain regulating means, a second substrate including second domain regulating means, a negative dielectric constant anisotropy liquid crystal, vertical orientation layers, wherein first domain regulating means including protrusions bent in a zigzag shape (i.e., including first line and second line portions) and the second domain regulating means including an array of protrusions or depressions or slips each being bent in a zigzag shape (i.e., including third line and fourth line portions) extending parallel to each other.

#### ***Terminal Disclaimer***

5. The terminal disclaimer filed on 06/27/2005 is not accepted since an attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

#### ***Response to Arguments***

6. Applicant's arguments filed 06/27/2005 have been fully considered but they are not persuasive as stated above (see paragraph 05).
